

OIL INDIA LIMITED - CEMENTING REPORT

CONFIDENTIAL / SYNTHETIC DEMONSTRATION REPORT — NOT ACTUAL OIL DATA

Report Title: Production Casing Cement Evaluation

Target Well: WELL-E | Document Type: Cementing Report

System: NWIS RAG Archive

1. Job Description

Well: WELL-E. Date: 2023-11-04.

Synthetic demonstration report — not actual OIL data.

Depth: 3200 m across Naga Thrust Zone.

2. Cement Channeling & Remedial Action

Event: Cementing Issue. Severity: Medium.

Cause: Channeling occurred behind 7-inch production liner due to incomplete mud displacement.

Mitigation: Performed acoustic CBL/VDL log, followed by squeeze cementing with 80 sacks microfine cement.

Outcome: Isolation verified by negative pressure test; casing integrity confirmed.

Drilling parameter: Standpipe pressure during squeeze reached 2400 psi.
