

OIL INDIA LIMITED - DAILY DRILLING REPORT

CONFIDENTIAL / SYNTHETIC DEMONSTRATION REPORT — NOT ACTUAL OIL DATA

Report Title: Daily Operations Log - Shift 24hr

Target Well: WELL-C | Document Type: Daily Drilling Report

System: NWIS RAG Archive

1. Daily Summary

Well: WELL-C. Date: 2022-08-19. Shift Supervisor: Operations Team.

Synthetic demonstration report — not actual OIL data.

Current Depth: 2150 m in Barail Series formation.

2. Incident Log - Mechanical Stuck Pipe

Depth: 2150 m. Event: Stuck Pipe. Severity: High.

Cause: Differential sticking due to excessive mud cake buildup against Barail Series sandstone bench.

Drilling Parameter: Torque spiked to 34 kNm, RPM dropped to 0 unexpectedly while reaming.

Mitigation: Spotted 50 bbl low-toxicity oil-based pipe-freeing pill across stuck interval. Jarred upward at 110 klbf.

Outcome: Pipe freed after 6.5 hours of jarring; circulated bottoms up and conditioned mud.

NPT recorded: 8.5 hours.
